EXPERIENCE

Remote — FullStack | NextJs| PHP

Feb 2021 - PRESENT

Working with a team of 3 developers website Frontend, story editor board and admin dashboard for the client Improvethenew.org. I have done the following Jobs.

- Used server-side rendered solution (Next.js) for the website.
- Used a caching system to query only relevant data.
- Optimized a front-end app performance to 80% efficiency
- Reduxified the whole application.
- wrote around 30+ customs hooks
- Wrote private library to use across all the repos
- Wrote multiple API's in PHP , MySQL .

Freelancer(Seasonal) ,Remote— Software Engineer

Jan 2020 - Jan 2021 (1y)

- Worked with a diverse range of technologies mainly Javascript and its frameworks .
- Hosting in different servers , linux , shell scripting
- Troubleshooted bugs in the application and wrote a root cause analysis for them.
- Optimized MySQL queries to enhance database performance.

London Web World , Remote— Web Developer

Jan 2019 - Dec 2019 (1y)

- Worked as Front End web developer in React.
